## Pierce County

## Ward County

## Foster County

## Cavalier County

“NDLTAP and the Road Scholar Program are great learning resources. I have learned gravel specs and different techniques of how to do things. I like that the training includes people from all different counties so that we are able to interact and share information. If you miss a class you can watch the recorded video of it in the NDLTAP archives. Earning Road Scholar credits and being awarded for learning is a plus.”
