

### Quick Steps

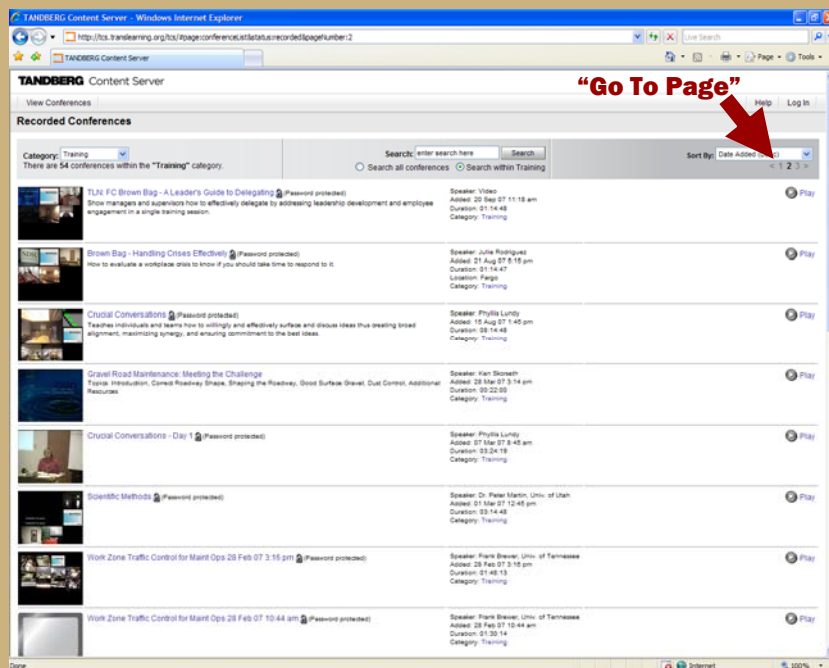

1. Using Internet Explorer, go to the website <http://tcs.translearning.org>
2. Find the video you are interested in
3. At the right side of the screen, click on the format and speed you prefer (Windows Media, 384K recommended)
4. Double-click on the video pod to expand it to full screen

### Step-By-Step

1. Open Internet Explorer and type <http://tcs.translearning.org> into the URL address bar.

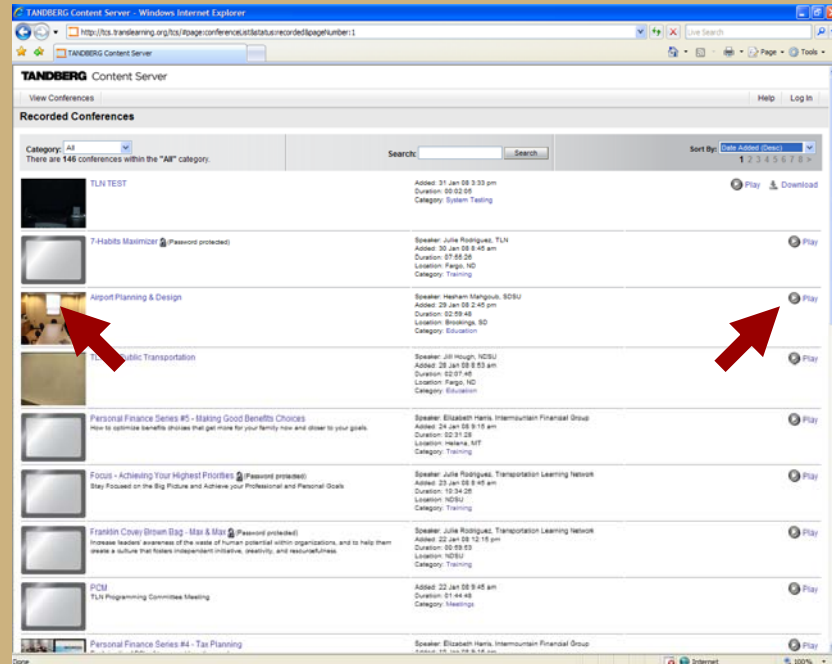

2. Browse the menu to find the video you are interested in. They are sorted by date with the most recent ones listed first. Browse to different pages by clicking on numbers in the "Go to Page" area to move through the list.

# Viewing TLN Recorded Videoconferences

- Once you have located the video you are interested in, click on the thumbnail image on the left or the “Play” button on the right. If a password is required, it will ask for it at this point. (The usual password is “tInlearn” but if that doesn’t work, ask your state DOT coordinator, your MPC representative, or the TLN staff for an event-specific password.)

- Once you’ve clicked to start the video, it will open a new window. Some videos may also be available for download to your computer or an MP3 player.

Contact the Transportation Learning Network if you have additional questions.
