

Evotherm Admixture

Items for discussion

- Mix properties in lab.
- Characteristics and densities in the field.

Mix properties in lab

No noticeable difference in either the appearance of the hot mix (hot bituminous pavement) or in the properties (i.e. Max. sp. gr., Bulk sp. gr., Air Voids).

Characteristics and densities in the field

During inspection on of the paving operation on the roadway, detected no changes in mix characteristics. No segregation behind the paver screed or tearing of the mat.

The Contractor was able to obtain densities even at the cooler temperatures.

Comparison of Densities

Date	Density without Evotherm	Density with Evotherm
10/17/2013	92.9%	91.6%
10/18/2013	92.9%	92.2%
10/23/2013	92.7%	93.3%
10/30/2013	93.1%	92.0%
11/1/2013	94.5%	93.0%

Density Comparison

Final result was a successful project.
