Attention Workzone Practioners

Below you will find a link to a webinar on a Kansas DOT deployment of a work zone intelligent transportation system (ITS) on I-35 near Kansas City. This is KDOT's first major ITS deployment to help manage traffic in work zones. The webinar on July 18 (12-3pm Central Time) will describe the project from conception to procurement to operations, provide a virtual drive through to show the work zone and the system in action, and demonstrate the system software.

Please consider inviting your organization's ITS staff to learn more about how ITS can be deployed in temporary situations like work zones.
