

Systemic Safety Webinars

FHWA is hosting a series of systemic safety webinars throughout 2015. The purpose of the webinar series is to continue the dialogue from the 2014 Systemic Safety Implementation Peer Exchanges and share information to advance systemic safety implementation efforts across the country. Participants will hear how State and local agencies have engaged partners, used analysis tools, and applied countermeasures to advance implementation of systemic safety efforts across the Nation. Upcoming webinar topics include:

- **June 8, 2015 (12:00 - 2:00 PM CT):** Using the Right Tools for Systemic Safety Analysis Learn about data analysis tools and approaches agencies are using to conduct systemic safety analysis. [Register Now](#)
- **September 29, 2015 (12:00 - 2:00 PM CT):** Selecting the Right Systemic Safety Treatments Learn about systemic safety treatments implemented by State and local agencies. [Registration](#)
- **November 2015 (Date TBD):** Advancing Systemic Safety Implementation Efforts Learn how agencies are using innovative implementation and evaluation approaches to advance systemic safety efforts.

For More Information:

Find out how this new approach to traffic safety is making a real difference on our Nation's roads and highways! The Systemic Approach to Safety web site at <http://safety.fhwa.dot.gov/systemic/index.htm> is your one-stop shop for everything related to the systemic approach to safety. You can download the Systemic Safety Project Selection Tool, review case studies and noteworthy practices, and learn more about the upcoming

webinars. You can also access the systemic training and technical assistance application and 2014 Systemic Safety Implementation Peer Exchange Reports. For further information, contact Karen Scurry, FHWA, Office of Safety, karen.scurry@dot.gov, 609-637-4207.

NEW! Work Zone Safety Application Suite Now Available!

Developed under the FHWA Work Zone Safety Grant for use on both iOS and Android smart phones and tablets, this **FREE** app can help users:

- Quickly determine both minimum device spacing and minimum number of devices needed for merging, shifting, shoulder, or flagger operations
- Calculate the number of devices you need
- Customize your results to incorporate local standards
- Learn about and apply best practices for stationary lane closures and short duration operations.
- Set up a temporary traffic control area.
