

Setting the standard in road maintenance equipment

GRAVEL RECLAIMER

- ▶ No post to impede operator visibility in any position and attaches to Capital I wing
- ▶ 25-35% savings reclaiming gravel
- ▶ 42" working width
- ▶ Extension cylinder allows the operator to extend reclaimer for a second pass
- ▶ Capable of shaping road slope
- ▶ Preloaded extension arm spring maintains reclaimer stability in carry position

Patented postless design offers excellent operator visibility and allows the reclaimer to extend
All hydraulics are controlled from the cab.

Extension cylinder allows the operator to make a second pass.

Loose link assembly allows reclaimer to float over obstacles up to 32".

Preloaded extension arm spring maintains reclaimer stability in carry position.

Mounts are utilized for the wing, mower, and gravel reclaimer.

Attaches easily using quick attach design

Cutting depth can be adjusted hydraulically from the cab

Capable of shaping road shoulder

Replaceable quick change carbide teeth
