KEEP YOUR MAINTENANCE COSTS GROUNDED

DustGard®

Mag Chloride Road Stabilizer™

42-61%

REDUCED AGGREGATE LOSS

TOTAL AGGREGATE LOSS

Colorado State University concluded that:
 "the cost savings of retaining aggregate on the treated sections more than offset the costs of the dust suppressants" *

30-46%

LOWER MAINTENANCE COST

ESTIMATED ANNUAL MAINTENANCE COSTS

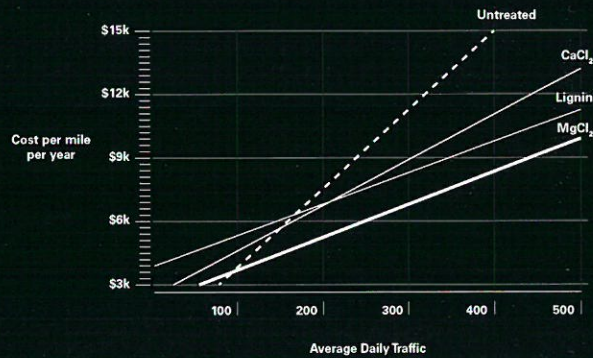

Annual maintenance costs included aggregate replacement, labor and equipment use of water trucks, motor graders and compactors, and chemical treatment material costs. *

* "Relative Effectiveness of Road Dust Suppressants". T.G. Sanders, J.O. Addo, A. Ariniello, and W.E. Heiden. Colorado State University Research 1993-1994

Researchers also established

TRAFFIC LEVELS AT WHICH DUST SUPPRESSION WOULD BE COST EFFECTIVE

COST OF TREATMENT vs. AVERAGE DAILY TRAFFIC (ADT)
 @ AGGREGATE COST OF \$11.57/TON IN PLACE

Calcium chloride and lignin treatments became cost effective at 130 ADT, while **MAGNESIUM CHLORIDE TREATMENTS BECAME COST EFFECTIVE AT 100 ADT.**

(assumes aggregate cost of \$11.57/ton in place) *

"Because of DustGard, it's been nine years since we've needed to re-gravel any of our roads. But, our biggest benefit is public safety and customer satisfaction. Since we've been treating our roads, we have reduced our complaints from the public by 90 percent."

VERLIN VAN ZEE
 Deputy Director of Highways
 Lakes Highway District, Idaho
