\$25 Registration Fee (includes printed training materials and instructor fees)

Registration Deadline: October 30, 2019

Falls Protection (3 hours)

This course is supported by the Department of Labor, and provides training to protect workers against falls especially from bridge work. Falls are the second-leading cause of death in the transportation construction Industry, behind runovers and backovers. As a part of this course the student will:

- Understand the basic methods to identify and reduce the exposure of the employee to falls,
- Understand the risk of falls from equipment,
- Identify the four steps to selecting the right fall protection equipment.
- Review the process for the development of a fall protection and rescue plan.

Confined Spaces (1 hour)

Trenching and Excavation (2 hours)

If you are replacing a culvert under the roadway or installing sewer lines below the elevation of the basement of homes in the area, the standards found in the OSHA excavation and trenching program provide a safe working environment. In this course the student will:

- Identify basic hazards associated with excavations and trenching,
- Recognize the need for strict adherence to benching and shoring requirements,
- Recognize required responsibilities of the competent person,
- Recognize the elements of soil stability and basic classifications,
- Recognize types of systems used to protect workers,
- Determine basic emergency response procedures.

Bruce Drewes: began his career in transportation over 34 years ago as a pipe layer for a construction company in Idaho. After being buried in a trench twice, he successfully pursued a career with the Idaho Transportation Department (ITD). As a project manager for ITD, Drewes became involved with OSHA and MSHA requirements for construction. For the past 12 years, he has been involved in the Safety Fest of Northwest as a founding partner and instructor. Drewes is currently a contract instructor, providing safety related programs across the U.S. with a focus on local agencies.

Target Audience: Field personnel including maintenance, construction, consultants and contractors and safety personnel.
