Most workers in construction, building development, and other related fields will need to take the OSHA 10-Hour Construction Training. This training will ensure that workers are able to identify, predict, prevent, and stop potential hazards in the workplace. This course is designed to be a general overview of many different subjects. The class will be 1 full day and one 1/2 day class.

The training will cover:
- fall hazards
- electrocution
- struck-by hazards
- caught-in/between hazards
- personal protective equipment (PPE)
- health hazards in construction
- safe materials handling
- tools — safe use of hand and power tools
- other subjects needed for your work place safety

**Instructor: Shawna Page.** Shawna is the Field Training Professional for Montana LTAP. Shawna has more than 28 years of experience in private and public sector construction, safety training and program coordination. Her expertise is safety training, including Flagger Certification, Traffic Control Supervisor, Work Zone Technician, Pilot/Escort Operations, Lead RRP Training, Asbestos Awareness, Hazardous Waste Awareness, OSHA 10 and 30 and First Aid/CPR Training.
