

PERMIT REQUIRED CONFINED SPACES Do You Know How to Get Out Alive?

On-site

3 Hours – Road Scholar Credits

SEPTEMBER 29, 2021 (Wednesday)

City of West Fargo, Public Works Building, 810 12th Ave NW, West Fargo, ND

8:00 AM – 11:00 a.m. CT

NO REGISTRATION FEE • Registration Deadline: September 22, 2021

Many workplaces contain areas that are considered "confined spaces" because while they are not necessarily designed for people, they are large enough for workers to enter and perform certain jobs. A confined space also has limited or restricted means for entry or exit and is not designed for continuous occupancy. Confined spaces include, but are not limited to, tanks, vessels, silos, storage bins, hoppers, vaults, pits, manholes, tunnels, equipment housings, ductwork, pipelines, etc. This course will:

- identify the four categories of hazards of confined spaces
- describe examples of confined spaces found in road construction
- recognize the responsibilities and duties of a competent person
- recognize the training and rescue requirements for personnel involved with confined spaces

Jack Kolberg, North Dakota AGC Safety Consultant, joined the AGC team in 2014. Previously, he served as vice president/safety lead at Northern Improvement Company for 27 years. Jack's safety focus runs deep, a passion that serves those around him well by providing safe work environments for his team members and for elevating his company's safety performance record. He is a recipient of North Dakota's prestigious Outstanding Safety Professional of the Year award. As North Dakota AGC's safety consultant, Jack blankets the state with powerful training and a positive and contagious safety attitude.

Target Audience: Field personnel including managers, supervisors, safety officers and staff that work in or around confined spaces (culvert work, trenching and manhole work) will benefit from this training.
