REGISTRATION LIMIT – 40 (limited to 5 attendees per agency)
REGISTRATION DEADLINE: APRIL 17, 2024

Construction Focus Four – “Struck-by Hazards”

This training will focus on the hazard of being “struck-by” something. On a construction site, that “something” could be almost anything. You may be struck by materials as they are being moved about the construction site. The bucket of a backhoe may hit you while you are in a trench. If you work near traffic, you may be hit by a motor vehicle. These are only a few examples of how you may be struck by something that can cause great pain or even death.

This program will help you recognize common struck-by hazards and show you ways to decrease those hazards at your job site.

Construction Focus Four – “Caught in or Between Hazards”

This course explains the different types of caught-in or caught between hazards commonly found on transportation construction work sites and how to mitigate the risks of being hurt or killed by vehicles and equipment.

Trenching & Excavating:

This course focuses on preventing the main hazards in trenching and excavations like cave-ins, falls, roll-overs, confined spaces, traffic, underground utilities, soil identification, and other related hazards.

Target Audience: All county, city, state, tribal employees working in hazardous areas.

INSTRUCTOR:

Steve Fischer, North Dakota AGC Safety Director, joined the AGC team in November of 2021. He retired from the ND Highway Patrol in 2020 having 25 plus years in law enforcement. Steve instructs a variety of construction industry safety courses which can be found on the AGC of ND website. He is a lifelong North Dakota resident who grew up in Ashley. Steve graduated from NDSU with degrees in sociology and social science.
